## PROJECTS

Alpics

- This is a website that offers an innovative AI-powered image generator. Using the OpenAI API, this tool allows users to input text descriptions and quickly generate corresponding images. This feature can be useful for a wide range of applications, including marketing, content creation, and creative projects. This is similar to other text-to-image generators like MidJourney and DALL-E 2, but offers its own unique approach and user experience. Whether you're a marketer, artist, or simply looking for a fun tool to experiment with, DALL-E 2 Clone is definitely worth checking out.

Info Blog

- A blog page build with Node.js and React which is an informative page about chat gpt3.
- Created a Fully Responsive Modern UI/UX Website in React JS hosted on Netlify.

## CERTIFICATIONS

- Meta Full Stack Web Development Certificate
- Google Foundations of Cybersecurity & Manage Security Risks
- Google Connect and Protect: Networks and Network Security
- Iamneo -High-Performance Coding Course using DSA Concepts
